# Instruction for use & technical data product group CopraDur (CopraDur Splint)

**C €**<sub>0483</sub>

Manufacturer	Whitepeaks Dental Solutions GmbH Alfredstr. 81 - 45130 Essen - Germany	
Product/ Product type	PA blanks for the production of splints	
Product form	Discs in different diameters	
Material type	Polyamide (PA) - medical device class IIa	
Circle of users	Instructed users, who produce individual dental splints	

## Indication/ intended use

CopraDur is exclusively suitable for the production of dental products.

Indication:

CopraDur is certified for use in the oral cavity and can remain in the mouth temporarily or permanently.

CopraDur Splint is clear and is suitable for the production of splints.

## **Contraindication**

Do not use in case of proven hypersensitivity against one of the components.

### Material properties/ technical data

composition CopraDur Splint (transparent)		technical data	
polyamide (PA)	100%	flexural strength (Weibull) water absorption solubility	72,8 MPa 31,7 μg/mm <sup>3</sup> -3,5 μg/mm <sup>3</sup>

## Instructions for use

For milling CopraDur, uncoated, single edged PMMA milling burs should be used. The milling strategy of your CAD/CAM equipment should be modified, as the material has a different impact strength for example from PMMA. Polishing paste should only be used with a soft polishing brush. Please make sure not to overheat the material during polishing. Work only with low rotation speed.

For an optimal milling result with our material we recommend the following parameters:

PMMA milling bur single edged: 2mm milling bur – feed rate: 25mm/s spindle speed: 16.000 rpm PMMA milling bur single edged: 1mm milling bur – feed rate: 19mm/s spindle speed: 22.000 u/m PMMA milling bur double edged: 2mm milling bur – feed rate: 25mm/s spindle speed: 8.000 u/m PMMA milling bur double edged: 1mm milling bur – feed rate: 19mm/s spindle speed: 11.000 rpm

Air- or water cooling is advantageous during milling. It is recommended to cool the material with water while polishing.

Occlusal und cervical wall thickness should not be less than 0.3 mm.

## Safety instructions

Warning: Always wear respiratory protection (filter class FFP2), tightly fitting safety goggles, protective gloves and protective clothing and switch on suction device. The dust produced during processing of this product may cause irritation to skin/ eyes/ respiratory system. Avoid inhalation/ contact with skin, mouth and
