

SHERAiso-3d - don't get the blues!
The isolating agent for 3D-resin printed models

SHERAiso-3d - don't get the blues! The isolating agent for 3D-resin printed models

There is no need - to lay it on to thick - with the brand-new isolating agent from SHERA for printed models.
The isolating layer is applied with only one stroke, saving you time, not to get the “blues” and your bottle of SHERAiso-3D lasts longer than comparable products.

Insulating agent for 3D-printed models

- apply only once
- highly visible isolating area
- saves time and material
- is water soluble and washable
- protects model from occlusion testing color
